

LEARNING PLAN

Unit of Competence: <i>Water supply system I</i>	Unit Code:
Name of Trainer: MR SIMON	Level: Module 1
Date of Preparation:	Date of Revision:
Number of Trainees:	Class: Plumbing
Skill or job task:	
This unit describes the competence required to install water supply system. It involves preparing pipe installation materials, performing domestic pipework and maintaining domestic pipework.	
Benchmark or Criteria to be used:	
• Prepare and quantify pipe installation materials • Sketch simple plumbing drawing and symbols • Perform domestic pipework • Maintain domestic pipework	

Week	Session No.	Session Title	Learning Outcome	Trainer Activities	Trainee Activities	Resources & Refs	Learning Checks/ Assessments	Reflections & Date
1	1	Prepare and quantify pipe installation materials	By the end of the session trainee should be able to: • Identify safety measures applied • identify pipe installation materials as per work requirements • prepare pipes in accordance with manufacturers instructions • install pipe materials as per work requirements	Trainer: • Demonstrate correct PPEs use in drawings • Provide sample drawings • Demonstrate reading and converting scale measurements • Teach standard plumbing symbols	Trainees: • Identify correct working drawings • convert measurements to actual size • identify and apply symbols • sketch drawings	• Training manual • OSH A 2007 • Plumbing Drawing standard	• oral questioning • observation • class exercise • written exercise	

					ngs			
2	1	PRACTICALS						
3	1	Sketch simple plumbing drawings and symbols	- Identify working pipework drawings - interpret pipework drawings - interpret measurements and symbols of pipework drawings	- Explain types of plumbing drawings - Demonstrate reading of plans ,elevations ,isometric drawings - Explain plumbing symbols and measurements scales	- Identify working drawings - provide drawings under guidance - interpret drawings with correct symbols	- Training manual - OS - OSH A 2007 - Standard plumbing symbols guide	- Practical - project - oral questioning - POEs - written test - third party report	
4	1	PRACTICALS						
5	1	CAT I						
	1	Perform domestic pipework	- Assemble piping tools and equipment - set out pipe layout from working drawings - mount pipes as per drawing specifications - mount auxiliary fittings as per manufactures installation - conduct functionality test as per procedure	- Demonstrate tools used in plumbing - demonstrate layout marking on site - demonstrate mounting methods - demonstrate pressure test - explain cleaning and	- Select and assemble correct tools - set out according to drawings - mount pipes under supervision - fix fittings correctly - test	- Training manual - OS - OSH A 2007 - Standard plumbing symbols guide	- Practical - project - oral questioning - POEs - written test - third party report	

			perform housekeeping as per procedure	waste disposal	installed systems clear work area			
7	1	PRACTICALS						
8	1	Maintain domestic pipework	- Identify repair materials as per job requirements - issue notice for maintenance operation - assemble tools and equipment as per work requirements - repair pipework faults - conduct housekeeping after maintenance	- Show repair materials - explain importance of maintenance notices - demonstrate repair tools selection - demonstrate repair techniques	- Select appropriate repair materials - prepare and issue notices - assemble repair tools - repair faults under guidance	- Training manual - OS - OSH A 2007 - Standard plumbing symbols guide	- Practical - project - oral questioning - POEs - written test - third party report	
9	1	CAT II
